FACTORY RECOMMENDED ESSENTIAL MAINTENANCE IS VITAL FOR YOUR MAZDA.

THE MAZDA ESSENTIAL 8,000 KM FACTORY-RECOMMENDED MAINTENANCE INCLUDES :

AN OIL & FILTER CHANGE WITH SYNTHETIC OIL

When done correctly and on a regular schedule, changing your engine oil and filter ensures a clean lubricating barrier to protect your engine from wear.

A COMPREHENSIVE 28 POINT INSPECTION THAT INCLUDES :

- √ Inspecting brake and clutch fluid, washer fluid, and coolant level
- √ Inspecting your air filter condition
- √ Inspecting all light function
- √ Lubricating locks and hinges
- √ Visual inspection outside and beneath your Mazda and under its hood

We inspect your Mazda's vital components to proactively monitor their condition and ensure peak operation.

TIRE INSPECTION & ROTATION

Tires are your only point of contact with the road. It's important that we monitor their inflation, wear, and overall condition, and then rotate them to ensure your safety, ride performance, and maximize your tires' longevity.

VEHICLE HEALTH CHECK INSPECTION REPORT

We always provide you with a detailed report of your Mazda to keep you informed on its condition and to avoid future surprises down the road.
